15	Notka ACC Bass	WLS 5 - XLR	DPA 4061	Anne-Mari
16	Notka ACC Dis	WLS 6 - XLR	DPA 4061	Anne-Mari

The band travels with a sound engineer.

We bring our own Soundcraft Ui24R mixer and microphones.

We need:

- 1 technician familiar with the sound system
- 4 straight microphone stands and cables.
- Wireless systems for 2 handheld vocal mics and 4 accordion mics.

In case venue can't provide WLS it is possible to bring our own (CONTACT US)

We use wireless in-ear monitors. Our Sennheiser wireless system uses A, B and G frequency banks.

- 1 stage riser about 3 metres wide, 2 metre deep and 40 centimetres high.
- 1 technician familiar with the venue light systems, who will be also responsible for doing the lights during the performance. Lights are an important part of the show.

PA-system should be professional quality to provide 105 dBA undistorted sound evenly to audience. SUBWOOFERS are a must. L'Acoustics, Nexo, d&b etc. CONTACT US if you are not sure!
